Crazy and wild designs for lots of coloring fun By iiiireader[[VIDEOID:d5bab63e26c82e55ff355007d89481de]] Attached is my silent and quick flip through video of the entire book of designs. I hope it is of assistance to you. "Color Me Crazy" is my first adult color book by Peter Deligdisch. After another reviewer stated that the designs were on both sides of the page, I was happy and surprised to

see that my book came with designs printed on only one side. The quality of the paper is good (though not a heavy weight) and it is a bright white. The only thing lacking is perforated edges - I wish more companies did this but it doesn't look like it would be too difficult to remove the pages from the glued edge binding. There are 44 designs in this color book. They are all quite wild and imaginative. There are a couple which have a sort of faded out look to the right hand side of the page. I don't know if that is intentionally part of the design or if the print quality went askew with those few designs. Depending on how I color those pages, I may re-inforce the faded look or remove it by adding more color to the outlines. While all of the designs appear to have a sort of "doodle" quality to them (if you can doodle this intricately and creatively - which I cannot), they are done in a variety of different styles. I really like this as it gives me a choice of styles depending on my mood on a particular day. The designs in the book appeal to both my husband and to me - which is not always true with various adult coloring books. Due to the intricacies of the various designs, I will certainly keep my magnifying lamp handy while I am working on this book. As I would expect from the thinness of the paper in the book, all of my gel pens and markers bleed through. I will use freezer paper in between the sheets (if I am keeping it in the book) or under the page if I remove it from the book. I find that it works well for me. You can also put multiple sheets of heavy stock paper in between if you don't have freezer paper handy (it is sold at most grocery stores and is fairly inexpensive and can be reused.) 74 of 74 people found the following review helpful. Top notch intricate coloring book, a MUST HAVE! By Arkay A. It just came in the mail and already I'm extremely excited to sit down and color this book. Here's the nitty gritty. There are six pages that are repeated from *Between the Lines: An Expert Level Coloring Book*. A few have minor design changes, but over 90% of the page is the same in some of these repeated pages. Quality control issues from the last book have been almost completely resolved. Lines are crisp and defined. There are a few pages in which the black lines fade a bit - it looks like inconsistent printing, but I suppose that could "possibly" be on purpose. The new pages are greatly varied, some naturescapes, some mechanical, others truly 'random' and creative... what we have come to expect from Peter Deligdisch. This book is well suited to gel pens, or well sharpened colored pencils. I keep a few very thin black pens, like Sakura Pigma Micron 0.1, to trace over lines that need it, so my finished page is colored, crisp, and neat. 62 of 64 people found the following review helpful.
