**Helen Harle : Create Colorful Aluminum Jewelry: Upcycle cans into vibrant necklaces, rings, earrings, pins, bracelets** before purchasing it in order to gage whether or not it would be worth my time, and all praised Create Colorful Aluminum Jewelry: Upcycle cans into vibrant necklaces, rings, earrings, pins, bracelets:

1 of 1 people found the following review helpful. Great teaching book for a very inexpensive craft. By Dona B. Mathis Great fun book! I have tried several of the projects. I never would have thought aluminum cans could be so fun to play with. And, the jewelry is very acceptable for everyday wear. The projects are very well photographed and instructions very understandable. I had no trouble making any of the projects. I would recommend this to teachers, elementary through high school, for art projects. Very inexpensive, fun, thought provoking craft and even young kids can work with the materials and tools. The book is very innovative at uses for the ever present empty aluminum cans. 0 of 0 people found the following review helpful. Make beautiful fragile jewelry. By Emily Massarotti Okay I'm giving this book a 3 star rating because it has some good points and some not so good. It is incredibly easy to follow and you'll be able to pretty quickly make up some aluminum flowers with minimal supplies to be purchased. You soon be making flowers that look just like the ones in the book....however, I stopped making jewelry once I wore my first ring

I made. The fragile aluminum pieces very quickly and quite easily break apart despite however careful you are. The jewelry I made although lovely is practically useless. 1 of 1 people found the following review helpful. Perfect book on how to get started making Aluminum Jewelry By A. Meier This is a great introduction book and can be used as an intermediate design book for those already using aluminum in their work. The book is small but mighty and has nice photographs. I would have liked a where to buy reference section as I found the fasteners/rivets the author uses in the book not available at either Michaels or JoAnn's. If you Google "scrapbook supplies" you really get too many items! So I found them on eBay. I think more detailed photographs on how to put the items together and use the tools would be helpful for beginners too. Luckily I am not a beginner, but I did have to really look closely on how the author put these together.

Create stylish, lightweight metal jewelry from recycled aluminum cans with Create Colorful Aluminum Jewelry. Author Helen Harle offers jewelry makers a fun way to work with metal that doesn't involve soldering or fusing. The projects can be made with simple punches and tools (including common scrapbooking punches), and are perfect for beginning beaders. This book features clear step-by-step photography and instructions, a complete basics section, and instructions that are designed for beginners to follow and not be overwhelmed.
