Adorable and overall great coloring book for the dad in your life!By lovebugI got this for my husband for Christmas because as per him, I'm always doing some type of art or craft project. I figured this would be more suitable than the many princess, doc mcstuffins, even regular adult coloring books we own. I must say I was still a bit nervous about whether or not he would like it however, it all worked out in the end. He absolutely loved it! Not only did he laugh but he's also actually colored in it! This is a big deal in my home because my hubby works a lot and doesn't have any kind of current hobbie when he is home. Now he can sit with the kids and

they can all color together. I really like the pages. We haven't had any colors leak through. He has currently only used gel pens in the book so I guess we will have to see about markers. Will update with photos soon!0 of 0 people found the following review helpful. ... for my husband for Father's Day and he absolutely loved it!By Darcus MurrayI ordered this book for my husband for Father's Day and he absolutely loved it!0 of 0 people found the following review helpful.
