This is definitely not your childrens coloring book or one you will be able to ahare with them like some adult coloring books. This is not because of the illustrations, they are fine for any age very detailed and require lots of time and concentration which is a perfect distraction but they are not not inappropriate. The words are what makes this an adults only coloring book, it's full of great puns like eww instead of you to go with a sheep picture, it also has lots of grownup words like the f word and the s word and others like that. They are really nice to read and unwind with. I don't get to color very much at once just because of household chores, but I make it a relaxing time when I do. I get my coffee my smokes and my mom only colored pencils and fill in a

couple parts of a picture and I feel better, more clear headed. Plus it's great to have something that's just mine since that doesn't happen much in my home. This is perfect for any grownup man or woman that's looking for a creative way to unwind. Bott I had a blast with this swear word coloring book! The word play was funny. For example: I decided to color one page that has a picture of a duck with the word Oh, above it. Oh Duck!! haha When it arrived, my adult kids wanted to go through every page right away, then picked out their favorites. Everyone's taste was a little different, as it should be. The paper quality is excellent. I could use markers on this paper without significant bleed through. It's heavy enough. The ink is good too. The swearing was done in as classy of a way possible. This book is funny in a very light naughty way. It is NOT raunchy at all. I like this book a lot and have already begun coloring a second page. I believe coloring allows our minds to relax and wander to what we need to work with in our busy lives. I'm going through a stressful time right now, but I looked forward to getting up and coloring each morning while I drank my morning cuppa. Mind focused, I then got on with my day. I don't know that you'll have the same benefit, but I found it therapeutic. I recommend this book very highly. By Lisa Bishop Got it for a friend's birthday. She has 3 young kids and 2 step kids/teens. Her house is always packed with people and she is always trying to keep up with the mess and the rush of places to go. She only gets a little time each evening to unwind and recently took up the adult coloring book fad. Especially since her younger ones like arts and craft time. At least she can get a good laugh until the little ones learn to read. The teens laugh at everything anyway.
