Book five represents the finest of information compiled from the pages of Projects in Metal published in the years 1996 and 1997. Techniques and shop tips abound and the machine specific projects will certainly improve your capabilities. This book has hours of pleasurable reading and inspiration with which to advance your skills, better equip your shop and to enjoy your machining pastime. Chapters include techniques, lathe accessories, milling, drilling, shop improvement projects and hobby projects. Many photos and detailed plans.
