Benedetti I don't often search backwards to do reviews on my purchases from .com, but when I come across a book I think others should truly enjoy, then I leave my opinion. I am currently 56 in the grandma generation and I am the local Flower Lady in my small town where I sell flowers on a card table out front for .10 each. I've been doing it for 13 years as of this season, and it has blessed me in so many ways. And I was thinking how much I would like to preserve this experience of joy in raising flowers for my grandchildren and future generations to look back and learn who I was long

after I am gone. So I decided to make pressed flower artwork behind glass. I had seen some at a local craft store and they are just too beautiful to behold. It is gray and wet here in our winters and to have these flowers pressed and in a picture on the wall kind of blesses us in the same way a fresh flower bouquet almost always brings a smile to one's soul. So this book is the huge answer to how to preserve my favorite thing to do and let my family to yet be born, look back and see who I was ... The Flower Lady, kids will see me in town and as if they saw Santa Claus, they will whisper to their moms, "there's The Flower Lady" mom. Can you even begin to imagine the joy that brings to my soul. This book is excellent, clear to understand and really updates the art of preserving flowers. It is an excellent book if you want to try this way to preserve flowers for whatever reason. 0 of 0 people found the following review helpful.
