Gary Edmundson, Steve van Beveren, Graeme Davidson, Jim Carswell : Modelling Armoured Vehicles (Osprey Modelling) before purchasing it in order to gage whether or not it would be worth my time, and all praised Modelling Armoured Vehicles (Osprey Modelling):

0 of 0 people found the following review helpful. Highly Recommended:)By C. D. BarnesI really like this book, it's a good, clear, concise guide to modeling AFV's for modellers of all skill levels. Highly Recommended:)0 of 0 people found the following review helpful. QualityBy AbnfscoordGreat book and has good details and pictures. I covers approximately 5 models, but really gives you good information and very detailed pictures. I applied many of the tips in the fe months that I have had it. I have been out of modelling for over 30 years and this helped bring me up to speed0

of 0 people found the following review helpful. too simpleBy A. LockeVery basic. Not detailed enough. Skips steps which leaves you in the dark. More of an overview than anything.

A central resource to all armor modelers from the complete beginner to the more experienced modeler, this book details all the steps involved in creating a realistic and attractive model armored vehicle. Gary Edmundson and his colleagues take the reader through all the steps required in armor modeling, from the basic stage of putting the kit together, through to the intricacies of texturing and elaborate paint schemes, finishing with how to display your model. Each chapter is illustrated with a range of different models covering the whole spectrum of armor modelling, including both Second World War Axis and Allied armor as well as more modern subjects. The authors also cover specific techniques and subject areas in which they individually excel, highlighting the different tools and approaches required for each individual discipline. Lavishly illustrated with over 250 images, this book contains all the detailed, step-by-step information you need to become an expert armor modeler.

This book is a wealth of knowledge in a small package. It really is a one-stop shop for a beginning armor modeler. I highly recommend this to any beginner or intermediate modeler trying to improve his knowledge and skills of armor models. I really enjoyed the whole book. The authors had a lot of information to convey and I think they did a great job of doing it. For the money, this book is a real value for the average modeler. So if you are an airplane builder looking to branch out or an armor guy trying to improve your skills, this book is your answer. Floyd S Werner, IPMS/USA (March 2009) Collections strong in modeling will welcome G. Edmundson, et. al.'s Modelling Armoured Vehicles, a fun survey of the steps involved in creating a realistic model armored vehicle. From the basics of putting a kit together to realistic paint schemes and different display options, military modelers will welcome this. The Bookwatch (February 2009) An excellent step by step guide to building finishing and displaying today's model kits. There's a lot of information in this little book. I would recommend this one without reservation. Mike McLaughlin, Military Modeling, militarymodeling.com (February 2009)...a well rounded publication and a book that I can easily recommend to you. I know that every experience level will find it to be useful. Scott Van Aken, modelingmadness.com (December 2008) About the Author Gary Edmundson was born in Sunderland in 1956. At the age of ten he emigrated with his family to Canada. He is currently settled in Fort Saskatchewan, working in the chemical industry as an analyzer technician. An interest in military aviation led to building military models for a hobby and Gary is now a regular contributor to military modeling magazines. Steven van Beveren has had a lifelong interest in all things military that has led him to serve as a reservist in the Calgary Highlanders for a number of years. This interest in the military also led him to start building military models at an early age. Over the years, he has been a member of several different model clubs, participated in model shows and written several articles. He lives in Alberta, Canada. Graeme Davidson is a serving officer in the Canadian Army and has been an active modeler for over 20 years. His work has recently been published in Military Modelling magazine and he is a regular contributor to the Missing-Lynx galleries. He lives in New Brunswick.
