By AchleighaWe homeschool and my oldest has a very in depth nature journal. My little man really "needed" one of his own, so I purchased this. I like that it is a legit book. However, every page is the exact same. I will, more than likely, purchase again for our baby when he gets old enough to really enjoy and explore on our weekly nature walks, but I wish there was a little more variety to the pages. I could have literally found a free file and printed it double sided, folded in half and created this myself. BUT...it's a real book with a binding so it is more authentic for the little guys. So, if you're looking for something with a little more options, this probably isn't the book for you. For a very young nature enthusiast, this fits the bill perfectly.

By VRMy grandkids love this book. Very handy for any field trip.  
2 of 2 people found the following review helpful. Great!  
By Corinne TkaczI bought this for my 4.5 year old son and he's loved adding animal drawings to it. We've shared in the writing, but the simple layout is perfect! We love it!

This field journal will allow your curious child to strengthen his or her observational and record-keeping skills. It is specifically designed for our youngest nature-lovers between three and seven years old, who can use it to document their exciting encounters with various animals.
