Jon-Paul Walton : My Gadget and Experiment Journal before purchasing it in order to gage whether or not it would be worth my time, and all praised My Gadget and Experiment Journal:

0 of 0 people found the following review helpful. 1/2 sizeBy MomOf4I should have read the dementions instead of assuming this was a regular size noe book. It will work, just not exactly what I had wanted. This book will not stay open easily either, making it more challenging to take notes during an experiment.0 of 1 people found the following review helpful. Five StarsBy Jinwen chenIt is OK

Perfect Bound Journal Book's dimensions 8.5" x 5.5" inches Laminated 10pt stock paperback cover 96 pages printed front and back on 60# white paper From concept to the final product, this journal is perfect for documenting your ideas, your drawings, and for recording experiments. This is a Perfect Bound book with sequentially numbered pages, witness signature, and date blocks. The book is ideal for use as a scientific journal (for recording experiments), as an engineering notebook (for designing and testing gadgets), for writing and creating characters, and for drawing.

From the Author Why pay more for an engineering journal than necessary? This journal is ideal for documenting ideas, inventions, experiments, and drawings. The 5.5" x 8.5" format is easy to carry, store, and handle. The book features all evidentiary functioning journal requirements and is ideal for documenting inventions, research, and experiments. It's a perfect journal for imaginative kids who like to draw, invent, and experiment. If you have any feedback or suggestions, for things that you may want to see added to the book, please send your feedback to kdfaire@kylodnbooks.com.
