Don Robinson : My Way: This book teaches a unique method of making a framelock or locking liner folding knife developed by a Toolmaker before purchasing it in order to gage whether or not it would be worth my time, and all praised My Way: This book teaches a unique method of making a framelock or locking liner folding knife developed by a Toolmaker:

0 of 0 people found the following review helpful. Very low word count. Not clearly written.By J. G.The book is worth the price if:1. You plan to purchase make liner locks2. You have or will be purchasing a milling machine.3. Have a pretty good understanding of how knives are made already.4. Are good at deciphering poorly written instructions.The book does have a pattern in the back of it, for the folder shown on the cover. If not for that, I would have likely given the book 2 stars.It is clear that the author knows how to make knives. Very nice ones at that. If all four criteria above

describe you, then buy this book. Only if you have read all the other books you can find on the subject, and you can easily afford the cost. 0 of 0 people found the following review helpful. Well written but intended for the more advanced beginner. By Charles R Leininger This book is intended for an advanced hobby builder and not for the beginner. The beginner will find there is information missing if this book was purchased to learn everything needed to build a knife. That said, this is a very good book and I learned much from it. 0 of 0 people found the following review helpful. Good clear instructions. By K. T. Young This book was purchased as a gift for a bladesmith who is learning to make folders. Very good instructions and illustrations are inside.

This book teaches knifemakers how to make a framelock folding knife.

About the Author Don Robinson is a heavily experienced Toolmaker, Manufacturing Engineer and Knifemaker. He has been making knives for the public since 1988. Don is the sole author of all his work, using the manually operated machinery in his shop. Don is an experienced heat treater and heat treats his own work.
