Tricia Guild, Nonie Niesewand, David Montgomery : Natural Flower Arranging before purchasing it in order to gauge whether or not it would be worth my time, and all praised Natural Flower Arranging:

All in color! Original, witty, and romantic: these designs bring new life to the art of flower arranging. 400 color photos show how an array of blooms, used naturally and spontaneously, are the loveliest, least expensive, and most renewable way to brighten any interior. Harmonize colors that have the same basic tones (such as yellow or orange), or boldly contrast striking magentas, pinks, and purples. Gleaming white arum lilies and tuberose make a simple, strong display on their own, or they can tone down a more vibrant bunch. Use ferns and grasses; choose containers of glass, ceramic, or metalware that enhance flowers; and emphasize line, proportion, and scent. Whether you want a fragrant country garden in a basket or a centerpiece for a table, these arrangements will spruce up every room in the house! Trim size: 10 1/4 x 10.
