I have markers on all the projects that I want to make. It is so easy to cut and connect the PVC pipe pieces. I keep smiling because every time I look at it I can say I made a PVC pipe patio table that you can secure a umbrella to for a fraction of the cost of purchasing one at the store.The instructions are easy to follow and there are pictures that show what your completed project will look like. There are various projects for inside and outside your home.3 of 3 people found the following review helpful. Design you own furniture and build it any size you wantBy Harry KeatonThis book has some great ideas for using PVC to build outdoor furniture. This is something people could get hooked on, designing and building your own furniture. You can build this furniture any size, if you are wanting a small outdoor chair for your grandchildren, then build a small one, if you need a big strong chair for big old fat Uncle Pete, build a big one for him, he will love you for it,,,lol.2 of 2 people found the following review helpful. Just what I was looking for,very cool book.By Tommy B.This book actually gives a list of dimensioned parts to assemble into the pieces of furniture it claims to.It describes all of the fittings,assembly techniques,and goes step by step. Very cool book and worth the buy if you can find it.Instructions for 19 different pcs of furniture .

Anyone who has enjoyed playing with Legos, Tinker Toys, or an Erector set as a kid will have fun building the PVC

furniture projects in this unique book. Edward A. Baldwin provides tips and techniques and complete step-by-step instructions for constructing furniture and other household accessories out of this durable and inexpensive material. Baldwin clearly explains from start to finish every facet of PVC furniture assembly. He gives readers practical, detailed guidance on how to select, cut, drill, join, finish, and even paint PVC. The 19 projects included in the book include a computer desk and chair and a canopy lounge swing, and are designed to be completed in one weekend or less. While Baldwin's furniture projects are ideal for any home decor, many of them can also be mass produced and sold for profit.
