**Myrna Garrison : Rare Imperial Glass Patterns** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Rare Imperial Glass Patterns:

0 of 0 people found the following review helpful. Rare Imperial Glass Patterns by Myrna Garrison By Inez J. Austin Imperial patterns are poorly documented and one needs lots of Imperial books to even be able to ID some of them. This book really helps with the harder to ID items. 1 of 1 people found the following review helpful. Very Happy By Customer I am very pleased with this book. The illustrations are great and the text is informative. Great for a new or long time collector. 7 of 8 people found the following review helpful. Rare Imperial Glass Patterns Review By S. Smith I returned this book as it was not at all (in my view) what the title suggested. There are few rarities included in this book. There are zero pages related to the old carnival glass patterns done by Imperial, and there are only 2 pages (10 pictures) related to Imperial Free Hand glass. A huge disappointment.

The Imperial Glass Company produced a wide range of beautiful glassware in many patterns and forms from 1901 to 1984. A thorough text and over 540 beautiful photos explore the many patterns, unique items, art glass pieces, private mould objects, wares made for customers to alter or decorate, and the glassware made in non-production colors that were produced by this prolific firm. Among the patterns displayed are Washington, New Rochelle, Pillar Flute, Laced Edge, Empire, Hobnail, Monticello, Cathay, "Molly," and "Zippered Heart." The text provides a brief history of Imperial, discussions of the firm's patterns, wares, the companies that contracted with Imperial for special items, and a detailed bibliography. Prices for the wares displayed are found in the captions. This book will be a treasure for everyone who appreciates beautiful glassware.

About the Author Myrna Garrison has been collecting and researching Imperial glassware for many years. She has authored several books on glassware with Schiffer Publishing and lives in Texas.
