Luc St Amour : Realistic Construction Models You Can Make: Complete Plans and Assembly Drawings for Eight Different Construction Vehicles (Vehicles you can make series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Realistic Construction Models You Can Make: Complete Plans and Assembly Drawings for Eight Different Construction Vehicles (Vehicles you can make series):

Making small-scale wooden models of large earth-moving construction vehicles can be done easily using the patterns and common shop tools described in these pages. Eight models featuring movable parts are presented and explained: loader, dozer, dozer loader, excavator, grader, skidder, grapple skidder, and backhoe. Complete assembly drawings for each of the eight toys make these projects simple and fun for adults to create. Drawings show the entire process, from building the wheelbase to adding the buckets. Full-size cutting templates can be used to make the projects exactly as they are shown or altered to create new vehicles. A parts list makes it easy for the hobbyist to gather all the materials needed for construction and assembly.
